How do I stop Git Extensions checking for updates?

Whenever I open Git Extensions, it tells me there is an update available. How do I stop this check, without installing the latest version?

git

I've been looking for a way to do this too -- my best guess so far is:

1. Close GitExtensions
2. Open this file in a text editor:

%userprofile%\AppData\Roaming\GitExtensions\GitExtensions\GitExtensions.settings

3. Look for `LastUpdateCheck` and set the value to some date far in the future, e.g. change the year to 2037

I don't know for sure that this works long-term, but so far it hasn't nagged me since I did this.
